THE EVERBLOOMING BUTTERFLY BUSH

SUMMER LILAC—LILAC COLORED FLOWERS

(*Buddleia Variabilis Magnifica*)—Free flowering, blooms all summer. The Buddleia is a deciduous bush, dying down in the winter. In the spring the top should be cut off quite close to the ground. The blooms come from the new wood produced through the summer. It is very rapid growing. It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. We recommend covering the roots as winter approaches. This plant is called Butterfly Bush because it has a strong attraction for butterflies. Price, small plants, 15c each; \$1.50 per dozen. Field grown plants, 40c each; \$4.00 per dozen.

Clematis Paniculata

We cannot well say too much in praise of this vine. A clean, thrifty, robust-growing vine of graceful habit with attractive glossy foliage, covered in August and September with a sheet of clust:ed snow-white bloom of the most delicious fragrance. No other vine so completely covers itself with flowers. An arbor or portico over which this Clematis is trained is a wall of white for the time being. Perfectly hardy, grows rapidly. See illustration on page 49.

We have an extra large number of these plants in small size, potted in greenhouse and offer at special low price of 15 cents each, \$1.50 per dozen, by mail. \$10.00 per 100 by express.

INNISFALLEN GREENHOUSES

Incorporated 1894

Established 1877

South Side Innisfallen Avenue, One-half Mile West of Yellow Springs Street

THE YEAR 1927 marks the fiftieth year since the INNISFALLEN GREENHOUSES issued their first catalog offering live plants.

In the early seventies, Mr. Charles A. Reeser, then a young man employed by an Eastern Florist, conceived the idea that live plants could be sent successfully by mail to distant parts of the country, if special care was taken in their growing, and if properly packed. He came to Ohio and located in Springfield, where he found the conditions of soil and climate ideal for the production of thrifty rose plants.

With the assistance of his father, he erected a range of greenhouses and gave them the name of INNISFALLEN. He commenced the growing of plants, making the rose a specialty, and in the Spring of 1877 issued the first catalog offering live plants to be sent by mail, thus the INNISFALLEN GREENHOUSES became a pioneer in the mail order plant business. The venture resulted so satisfactorily that the following year an increased number of catalogs were issued and in each succeeding year the business continued to flourish.

In 1894 Mr. Reeser retired, and the establishment was purchased by The Geo. H. Mellen Co.; for nearly 33 years the business has been conducted with increasing success and now counts its customers by the tens of thousands.

The INNISFALLEN GREENHOUSES have grown until they today stand as one of the largest, best equipped and best conducted establishments of its kind in the world.

So much for the past, but let us say that we mention it only as an evidence that we have fully established our reputation as being reliable, dependable and trustworthy; although old in years we endeavor to be "up to the minute" in providing any new or meritorious varieties or articles in our line. Our faces are set toward the future, believing that our record of the past will be a benefit in progressive effort to excel.

In this our Golden Jubilee Year, we ask our friends to join with us in helping to make this the most prosperous year in our history; this you can do by entrusting us with your own order and recommending us to your friends and neighbors.

You will notice that we have in many instances (especially roses) greatly reduced former prices, but please do not understand that quality has been lessened, indeed our plants this year are exceptionally fine. While we specialize in roses we grow and offer a complete line of plants, seeds, bulbs, shrubs and fruits in vast quantity, and are prepared to execute orders for practically everything for the home, lawn or garden, including fertilizers, insecticides, etc.

Please read carefully our offers on following pages, take advantage of our 50th anniversary prices, and depend on us for prompt and satisfactory service.

Call and see us, we are glad to greet visitors at any time. Sincerely yours,

Innisfallen Greenhouses

It is our earnest wish that all our patrons shall succeed with plants, bulbs or seeds purchased of us. We suggest that you keep this catalogue for reference to this page.

Outdoor Planting We are often asked as to the best time to plant. Always choose the most favorable time in your locality, and order accordingly. We can send most plants safely when desired. As there are so many degrees of latitude and such varieties of temperature from various causes, it is impossible to dictate as to the precise time to plant out of doors. Customers must judge of this for themselves, always remembering that it is not safe to plant out until all danger of freezing is past, and the ground is in warm, mellow condition. For the Northern States we recommend Spring as preferable to Fall planting.

Roses No garden, however small, is complete without Roses. All that is necessary to have them grow and bloom freely is to plant them in a bed of deep, fresh, loamy soil, well enriched with thoroughly rotted manure, and they are certain to do as well as a bed of Geraniums.

Pruning March and April are the best months for this operation. Moderate pruning insures growth and more blooms. Cut out all decayed wood.

Remember, that the Hybrid Perpetual, or June Roses, bloom on wood of previous year's growth, and this should not be cut off before blooming time.

Mildew This is a fungus disease, shown by the grayish, crinkled and mouldy appearance of the foliage, caused chiefly by cool nights and hot days. Remedy: Dust lightly over the foliage flour of sulphur on a warm, sunny day. Healthy, vigorous, well-cultivated Roses in well-located beds are less liable to the ravages of insects and diseases than weak specimens of slender growth and poor vitality. Therefore, keep your Roses healthy by good cultivation.

Begonias Begonias delight in a soil of rich loam, woods earth and sharp sand, and require a warm, moist atmosphere, and shade in summer. Never plant Rex and Tuberos Begonias in the open sun. A shady nook on the north side of a building or under a grape-arbor is the place for these.

Chrysanthemums Small plants can be planted as early as the first of April, but any time to the middle of May will be soon enough. The soil must be made rich with manure, and kept clean.

See further hints on page 18.

Callas The best course of treatment for the Calla is, after flowering, to give them a rest for about three months, by keeping the entire ball of soil nearly dust dry. After this, the earth should be soaked and washed from the roots, repotting into fresh, rich soil. Give an abundance of water daily, until through their flowering season. Use rather small pots so that roots will soon become crowded.

Dahlias Should have a strong, deep and rich soil. They grow rapidly, and consequently are gross feeders, and are benefited by frequent applications of water during summer, and by liquid manure after the buds are formed. Soil should be kept well loosened about the plants. Dahlia roots can be stored in winter same as Cannas.

Fuchsias Fuchsias require a light, rich soil, and quantities of water when in good growing condition. If allowed to become dry, they will surely drop their leaves. They do not like heavy currents of air, and should never be exposed to the full blaze of the sun. Light soil, moisture, and partial shade are what they like.

Petunias and Heliotropes The plants make a rapid growth in the open air, and bear an abundance of flowers until frost. For winter blooming, the Heliotropes should be given the most sunny place that can be afforded, as they will not thrive in much shade. Use good, rich soil, with a small portion of sand.

Pansies Always plant Pansies in a shady location where they receive the early morning or late afternoon sun, or in a location where they receive both early morning and late afternoon sun. Never plant them in a sunny location, as they will not live during hot summer.

Pelargonium or Lady Washington Geranium

Pelargoniums delight in a temperature of 50 to 60 degrees. These plants do best if kept in pots. Use a good loamy clay soil, one-fifth part well-rotted cow manure and a leaf mould if it can be procured; if not, add a little sharp sand. Water freely during spring and summer and sparingly during fall and winter. Pots plunged in a shady location in open ground is the best way to keep them during the hot summer months.

Hardy Plants and Shrubs Always select an exposed or sunny location, if possible. Plant very early in spring, while plants are dormant. This will advance them sufficiently to withstand their first trying season. You will have no trouble if you plant early. Water freely, especially the first summer. Peonies, Hardy Hibiscus, Rudbeckias, Achilleas, Hardy Phlox and Lily-of-the-Valley should be lifted every second or third year, clumps divided and transplanted. Give them an occasional hoeing. A light mulching once or twice a season will be found very beneficial. Rapid-growing shrubs, such as Snowballs, Lilacs, Ailceas, Honeysuckles and Calycanthus, should be pruned and thinned out every second year. In pruning cut out all branches of minor importance, leaving only the strong ones.

For Most Other Plants Too numerous to mention here, the following short rules will generally apply: Use one-half garden soil, one-fourth manure and one-fourth sand, thoroughly mixed. Never put a plant, when small, into a pot larger than necessary to accommodate the roots nicely. Plants should be repotted once or twice a year, removing a part of the soil from the ball, and if the plant is strong and healthy, should be put into a pot one size larger. Always remember that over-watering is injurious to a plant, as it will sour the soil and cause the roots to decay.

Tender pot plants will not stand a cold draught in winter. Keep a sharp lookout for insects, and destroy them before they can do any damage.

Ever-Blooming Hybrid Tea Roses

THE HYBRID TEA ROSES are the hardiest of the ever-bloomers, standing the winter in the northern latitudes with but little protection, and are perfectly hardy south of the Ohio River without any protection whatever. They bloom constantly throughout the summer. The flowers increase in size and beauty as the weather becomes cooler, coming into perfection in autumn. This is, we believe the most popular class of Roses now in cultivation. These varieties are the result of a union between the ever-blooming Teas and the Hardy Hybrid Perpetual class, thus combining the exquisite richness of coloring and beauty of form in the one with hardiness, vigorous growth and pungent fragrance of the other. The following collection has no equal.

Price, Young Plants, 15 Cents Each; Twelve for \$1.50, Except Where Noted. Two-Year-Old Plants, from 4-inch Pots, 40 Cents Each; Twelve for \$4.00, Except Where Noted.

Annie Laurie Bud large, long pointed; flower large, cupped, very double, very lasting; flesh pink, edges deeper, golden yellow base extending a third of the petal; borne on long strong stem. Foliage abundant, large, rich, glossy green, disease resistant. Few thorns. Very vigorous, upright, bushy. Profuse and continuous bloomer. Young plants, 20c; two-year-old, 50c.

Antoine Rivoire A handsome new Rose of vigorous habit of growth, with large, full Camellia-shaped flowers. Color rosy-flesh, on a yellow ground, shaded with a border of carmine; flowers five inches in diameter.

Bessie Brown We regard this Rose as one of the finest Roses in cultivation. The flowers are very large and highly built and double; color is a creamy-white with a beautiful shade of pale, tender flesh, resembling gloss silk. It is highly scented and a most magnificent Rose in the open ground.

Crusader Color rich velvety crimson. Buds and blooms immense and of great substance, very full and double and the largest Rose of its color we have yet seen. A big, strong grower soon produces a rugged bush loaded with the finest blooms that can be grown. Foliage heavy and free from disease. Hardy and a profuse bloomer.

Columbia.

Columbia A big Rose, the open flower measuring 6 inches across. The color is a true pink, about the shade of a perfect Shawyer, deepening as it opens to glowing pink. A peculiarity of the variety is that the shades all become more intense until the full maturity of the open flower is reached and this color is enduring; a great Rose.

Eugene E. Marlitt Rich bright carmine with scarlet tones. It is a strong, upright grower and a constant and profuse bloomer with extra large flowers; full, deep and double, and deliciously tea-scented. Bright, deep, shining rose.

Crimson Queen Strong, upright grower, flowers large and full. Color a rich bright velvety crimson. A grand garden Rose as it is always in bloom.

Etoile de France The gold medal Rose of France—flowers very large and borne on good, long, stiff stems; color a lovely shade of clear red, crimson-velvet; very fragrant and keeps well. In England where it has been tried extensively, it has caused quite a sensation. Good grower, free bloomer, fine, rich color, deliciously fragrant.

Francis Scott Key The flowers are from large to very large, opening to a high center. The color is a magnificent deep red rose. Wherever it has been staged this Rose has swept all competitors from the boards and secured every prize it has entered for. Grand for the garden.

F. R. Patzer A beautiful and distinct Rose of very free flowering character; the growth is very robust and erect, with large and handsome foliage. The blooms are produced with great freedom, they are carried on stiff, stems and are of large size and substance and perfect formation; highly tea-scented. Color, brilliant salmon-pink, of very fine shape, buds sharply pointed.

Golden Ophelia It is a sturdy, stiff-stemmed grower, with beautiful foliage, quite closely set, and glossy. The flower is of medium size, from a beautifully formed bud of bright, golden yellow. Has excellent texture; profuse in bloom; makes a marvelous "bush." We are very enthusiastic over this beautiful, true yellow novelty, which will rank high in its class. Fine when used in corsage work. Price, 25 cents each; plants from 4-inch pots, 50 cents each.

Gross an Teplitz As a bedding Rose this is one of the finest. The color is brightest scarlet, shading to deep, rich velvety crimson. It is very fragrant. The freest grower and the most profuse of any ever-bloomer. The mass of color produced is wonderful, and the foliage is extremely beautiful. A queen among scarlet bedders.

Kaiserin Augusta Victoria.

Kaiserin Augusta Victoria The best white Rose in the world. This beautiful Rose has not only a royal name, but it is a royal Rose as well. It is a continuous bloomer, producing successive crops of buds, and formed with large petals of best substance; shows no center when fully open; color pure creamy-white. It far surpasses any other white Rose in all particulars, and has a much richer perfume.

Lady Plymouth.

Lady Plymouth (Tea.) The color is a pearly, delicate but deep ivory-cream, faintly flushed, giving it a most piquant finish that is difficult to describe. Awarded gold medal National Rose Society of England and silver medal at Crystal Palace Show, London.

Madame Butterfly Fancy colored Rose. It averages more petals to the bloom; it produces more blooms to the plant, because it makes more branches, every one carrying a bud. The buds are a lovely shade of Indian red, yellow at the base; they are unique for corsages and for low table decorations; the opening flowers are perfect in form and texture, clear and brilliant in color, and of delicious fragrance. All the color tones are strong, making it a harmony of bright pink, apricot and gold. Undoubtedly will rank near the top in popularity. Price, 25 cents each; plants from 4-inch pots, 60c each.

Mrs. John Cook White, suffused with delicate pink, describes the color of this strong-growing big-flowered beauty. The color varies with the season, the flush of pink being more pronounced during cool weather, while the Rose is almost white during the long days of bright sunshine. Bud is long and shapely, opens perfectly to a full double flower; petals are of fine texture and substance. Blooms freely and is destined to take front rank among white Roses. Price, 20 cents each; plants from 4-inch pots, 50c each.

Mrs. A. R. Waddell A strong, rampant grower with foliage that is ornamental in itself; buds long and pointed, rosy-scarlet, opening copper-salmon; large and semi-double; but a wonderful keeper.

Madame Caroline Testout This charming Rose is in great demand. Clear, bright, satiny-pink; flowers very large and extremely showy; quite distinct. It is the Rose par excellence in Oregon and the Pacific Coast; in fact, it does well everywhere.

Mrs. Aaron Ward One of the most delightful Roses of recent years in a color that catches the eye at once. Coppery-orange in the open bud, golden-orange when partly developed, pinkish-fawn of lovely shade when fully open, when it looks like a full fluffy silk rosette.

Madame Jenny Gillemot Buds long and pointed, deep saffron-yellow, opening canary with dark golden shadings; blooms large, petals immense; opens very freely; a fine upright grower of branching habit; exquisitely beautiful, very large in size, bud very long and pointed.

My Maryland This splendid American introduction is destined to become one of the most popular varieties in cultivation. Large, double flowers, a pleasing shade of salmon-pink. Distinct and beautiful. Splendid for forcing.

Helen Gould This is a better Rose for general planting than American Beauty, the dream and hope of every Rose grower for years past. The flowers are full and perfectly double, the buds beautifully made and pointed. The color is warm rosy-crimson, like the color of a ripe-red watermelon.

Helen Cambier Great Yellow Garden Rose. The growth is free and vigorous, very free blooming, flowers of splendid substance and a delightful shade of deep rich golden-yellow. In extreme heat comes a deep amber color. The buds are full and firm, lasting a long time when cut. As the flowers expand the center of the Rose discloses depths of golden-yellow, with light orange tints, while the outer petals lessen to lemon-yellow.

Hoosier Beauty Glowing crimson-scarlet with good length and splendid shape; ample petalage with a texture like velvet, opening into a magnificent bloom of dazzling brilliance.

Jonkheer J. L. Mock A pink Rose from Holland; vigorous in growth and hardy, with long, smooth canes and great freedom of bloom. Flowers are round and full, bright, pink, faced carmine. Splendid bedder.

Killarney A very beautiful Hybrid Tea Rose. The color is an exquisite shade of deep shell-pink, lightened with silvery-pink. The base of the petals is a soft silvery-white, relieved with enough yellow to make it more attractive. Buds exceptionally long and beautifully formed.

Miss Amelia Gude A Charming Yellow Rose. A cross between Columbia and Sunburst. Bud long, pointed; flower medium size; lasting; outer petals reflexing, deep yellow center, shading to cream; fragrant. Foliage very handsome dark green. Very vigorous, upright; very free bloomer. Price, small plants, 20 cents each; plants from 4-inch pots, 50 cents each.

National Emblem.

EVER-BLOOMING HYBRID TEA ROSES—Concluded

Radiance.

Radiance Color a brilliant rosy-carmine, displaying beautiful opaline-pink tints in the open flower. The form is fine; flower large and full with cupped petals. A fine variety, especially on account of its value as a summer cut flower variety. Very free in growth and production of bloom, has good habit; lasting qualities of the flower are wonderful.

Rhea Reid A Rose of the type of American Beauty, but of the easiest culture. It never mildews or black-spots and opens its large flowers perfectly under all weather conditions. In color it varies with the temperature, in summer a bright cherry-rose while in winter it is a rich crimson-scarlet.

Red Letter Day An exceedingly beautiful Rose of infinite grace and charm. Its velvety brilliant, glowing scarlet-crimson buds and fully opened, cactus-like flowers never fade as the reflex of the petals is satiny crimson-scarlet.

Red Radiance Similar to Radiance in form and growth, except color, which is a fiery-scarlet. Excellent garden Rose as well as a good forcer. Form is fine, flower large and full cupped petals.

Sensation Well supplied with a heavy luxuriant foliage. The flowers are fine any season of the year. The color is an entrancing shade of red. The bud long-pointed and the open flower beautiful, with extreme size and good color to the last. The stems are long-jointed and strong with ample foliage. Price, 20 cents each; two-year-old, 50 cents.

Sunburst Has long-pointed buds. The color is orange-copper or golden-orange and golden-yellow; edge of petals lighter; all intense shades extremely brilliant in effect. Belongs in the class of Big Roses.

President Taft It is without question the most remarkable of all pink Roses. It has a shining, intense deep pink color possessed by no other Rose. It is a fine grower, free bloomer, good size and form, fragrant.

White Ophelia It produces a large flower, and has the strong qualities of growth, foliage and constitution. Owing to the stiff, beautifully formed outer petals, it holds the bud form longer, and the golden stamens add to the beauty of the opening flower. The color is white, sometimes showing a daybreak pink in the center on opening; never shows a disagreeable color tint, and is free from mildew. Price, 20c each; plants from 4-inch pots, 50c each.

Wellesley A Beautiful Pink Rose—The color is a beautiful shade of pink, the outside of the petals being bright and clear, with a silvery reverse. It is a very vigorous, healthy grower, carrying the flowers on long, stiff stems, which are clothed with heavy dark green foliage.

Price, Young Plants, 15c Each, Twelve for \$1.50. Plants from Four-Inch Pots, 40c Each; Twelve for \$4.00; Except Where Noted.

Souv. de President Carnot A charming new French Rose. A handsome bronzy-green foliage and large, elegant shaped buds. The flower is of large size, exquisite shape, with heavy, thick, shell-like petals; buds long and pointed, similar to Niphetos, but very much larger, and all borne on long, stiff, erect stems. Color a delicate rose-flesh, shaded a trifle deeper at center. Very profuse bloomer.

Therese Zeimet Lambert Hybrid Tea. Color rose with yellowish copper; perfectly formed.

White La France It is identical with La France, except in color. Pure white, sometimes tinted with fawn.

Pink La France No variety can surpass it in delicate coloring—silvery-rose shades, with pink. It has a satin sheen over all its petals; hardy beyond question.

Wm. R. Smith.

Wm. R. Smith (The Maiden Blush Rose.) A most charming summer bedder with beautiful, firm, glossy foliage quite like Cochet in appearance and durability; very vigorous in growth, with flowers of heavy texture; color, creamy-white with shadings of pink. Succeeds admirably in the open ground, bringing fine blooms on long, stiff stems. Hardy with light protection. This should be in every garden.

White Killarney It is pure white in color, long in bud, of fine form; in fact it is the one Rose par excellence. It is also a great garden Rose.

ROSE-GROWING MADE EASY

Don't Bother with Budding or Grafting. Briar is Always a Nuisance.

"The common belief that all modern Roses must be budded or grafted to secure permanent trees is not accurate, says 'Answers' (England). Roses growing on their own roots will give results equal to any produced on briars.

"Growing budded Roses is a source of endless trouble to many novices. The briar grows up and the grower, not knowing it from the real rose growth, allows it full scope. In a year or two the briar has asserted itself, takes full control, and nothing but dog-roses are produced.

"With Roses on their own roots, there is never any of this trouble. Should the bush be cut down by frost at any time and the roots not harmed, real rosewood is again produced in the spring. On the other hand, many amateurs have set out to plant a rosebush and secured the best of budded stocks, but in a year or two have had only briars for their trouble.

"With a budded rose you may get more vigorous growth, and probably a more robust bloom, but give a rose, growing on its own roots, liberal treatment and it will come in first every time.

"The gardener who sets out to grow roses on their own roots simplifies his work."—The Evening Bulletin—Philadelphia, September 12, 1925.

OUR PLANTS ARE ALL PLAINLY LABELED TRUE TO NAME

Our "Garden
Collection" of

Choice Ever-Blooming Tea Roses

For Outdoor Bedding or Indoor Pot Culture

Price, Young Plants, 15 cents each; 12 for \$1.50. Large Two-year-old Plants, from four-inch pots, 40 cents each; 12 for \$4.00.

THE ROSES in this collection are highly valued because of their fine colors and exquisite tea fragrance. They will bloom freely from June until November. This is a collection of Roses that no real Rose lover can afford to miss; some of them are particularly famous for the large size, beauty and brilliant colors of the bloom. They bloom freely; flowering all summer through. If planted in the spring so that they may become thoroughly established during the summer, they will, with few exceptions, prove hardy here, with protection during the winter. They are the product of years of experience and our improved methods of culture, which insure plants of the greatest possible vitality and abundance of bloom. You will be delighted with the exquisite beauty of form and color. Examine the list carefully.

Alexander Hill Gray.

Alexander Hill Gray Color is deep lemon-yellow which intensifies as the blooms develop; flowers large, of great substance and perfect formation; it has a high-pointed center from which the petals gracefully reflex. We recommend it highly.

Champion of the World Everyone wants a hardy ever-blooming Rose. From early summer until frost it can be depended upon to produce flowers in abundance; color rich glossy pink, delightfully fragrant, and such a strong, vigorous grower that it is almost invulnerable against attacks of insects.

Clothilde Soupert Color a French white, deepening to a rosy-blush in the center, exceeding in distinctness of shadings the well known Malmalson. Its greatest value lies in its compact, vigorous habit and wonderful profusion of bloom. Form and substance of the flowers are so perfect that the hottest weather does not cause a deterioration of either, so that even in mid-summer a bouquet of splendid buds and open flowers can be obtained from this variety. Hardy with protection.

Etoile de Lyon This magnificent Tea Rose, south of the Ohio river, has proved to be perfectly hardy. Blooms in the greatest profusion and each bud is a gem. Flowers are very large, double, full and deliciously fragrant. The color is a beautiful chrome-yellow, deepening at center to pure golden-yellow.

Mlle. Franzisca Kruger The striking color of this handsome Rose places it at once in the front as a bud producer in the open air. In its shading of deep coppery-yellow it stands unique and distinct from all others. The flower, when open, is of good size and very symmetrical. One of the finest Roses to plant in masses and clumps.

Helen Good, the Beauty Cochet This is a true Cochet Rose, and after two years' trial in the garden we pronounce it as good as, if not better than, any Rose for the garden ever sent out. The color is white suffused with pink, each petal edged deeper.

Meteor This splendid Rose is one of the brightest colored of all, considered among the very best for bedding and general planting. The color is a rich velvety crimson, exceedingly bright and striking and the flowers are large and regular fully double and borne on nice, long stems. It is a quick and constant bloomer and quite fragrant. Never fails to please.

Marie Guillot This beautiful Tea Rose continues in popular favor, and still maintains its position as one of the best white Roses of its class; flowers of an unusual style, entirely double to the center; very sweet scented.

Perle des Jardins Probably better known than any other yellow Rose grown. Beautiful clear yellow, distinct from all other Tea Roses.

Souvenir de Pierre Notting The bloom is very large, perfectly full, elegant form; has a beautiful long bud; the colors are very bright, distinct and clear and have no unpleasant tones—orange-yellow, bordered in carmine-rose.

The Bride The buds are very large and of exquisite form; the petals are of fine texture and substance, and the full flower is very double measuring from three and one-half to four inches in diameter. The color is a delicate creamy-white. The blooms can be cut with long stems and will last in a fresh state after being cut longer than any known variety.

Bridesmaid The most popular pink Tea Rose. Thousands of this variety are grown every year for cut flowers, and it is also very desirable for summer bedding out of doors. It is a delightful shade of bright pink, very free flowering and easily grown.

Blumenschmidt Pure citron-yellow, outer petals edged tender rose, a sport from Franzisca Kruger, which it resembles in form, and which has a more vigorous growth. Winner of three first premiums.

Mlle. Franzisca Kruger.

WE PROMISE PROMPT AND SATISFACTORY SERVICE.

Four Famous Cochet Roses

THESE are among the very finest hardy ever-blooming Roses in cultivation. They stand at the head of the list and are not surpassed by any others in beauty or productiveness, and no difference what other Roses you have, you want the Four Great Cochet Roses also. They should be included with every order.

THE COCHET ROSES

Are unexcelled for beauty of shape and color—and are perfectly hardy south of the Ohio River.

PINK MAMAN COCHET

The Queen of All Garden Roses

Such beauty and exquisite form as is possessed by this variety is well-nigh marvelous, and cannot be seen in any other Rose we know of, outside of its counterpart, White and Yellow Maman Cochet. The buds are beautiful, large, full and firm, and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and a half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Small pot plants will in the open ground quickly make large, strong bushes, and produce, on long, stiff stems, great numbers of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich, clear pink, changing to silvery-rose.

RED COCHET

(Mrs. B. R. Cant)

A fine garden variety of even shade of deep rose or red, round and full, the form of a good Hybrid Perpetual. A very free grower, in fact it is one of the strongest growing Roses we have. It flowers as continuously and freely as a China Rose, and is especially fine in autumn. This Rose is bound to take rank with the best Roses grown.

WHITE COCHET

A grand Rose. Identical with its parent, Maman Cochet, the queen of all pink garden Roses, except in color of flower, which is snowy-white, sometimes faintly tinged with the faintest suggestion of pale blush. It has the same freedom of bloom, magnificent form of buds and flowers, which is marvelously beautiful in its perfection. The flowers are large and very double, with petals of unusually heavy texture, making it of more than ordinary value in open ground.

YELLOW COCHET

(Mme. D. Matrat)

The unusual hardness of this Rose—a pure Tea—makes it especially adapted for bedding. It is a fitting companion to those other grand summer Roses—the White and Pink Cochets—offering a sturdy, clean growth with stiff stems and luxuriant bloom. Flowers large, perfectly double and shapely, of a rich sulphur-yellow.

Maman Cochet.

Nothing can take the place of the Rose; almost every home has room for at least a few.

TWELVE SPECIAL FAVORITES

Including the Unsurpassed Bessie Brown and Helen Gould.

They are all strong, vigorous growers, bloom abundantly and all are among the hardest in this ever-blooming class. They will bloom the first season and every succeeding season, all summer long, even the one-year size, but best about them is the beauty of the flowers, in form, color, fragrance, every way; but read the descriptions on preceding pages and then order. If you can only have a few Roses, don't fail to get this collection. It will give you unbounded satisfaction. We have made the price very moderate, placing them within the reach of all. THE BEST OF THE HARDY RAMBLER ROSES

THESE MAKE INEXPENSIVE PLANTINGS FOR ROAD SIDES AND LONG WALKS

These beautiful, hardy Climbing Roses are unexcelled. There is nothing like them after they become established in their strong, luxuriant growth, freedom of bloom and bright colors. This family of Roses has become so popular everywhere, notably the famous **Crimson Rambler**, **Pink Dorothy Perkins**, **White Dorothy Perkins** and **Excelsa**, that extended descriptions are not necessary. They are almost as necessary adjuncts to one's home as the furniture in it. Absolutely hardy everywhere; once planted, they are practically permanent.

Price, 15c Each; 12 for \$1.50; two-year-old plants, 40c; 12 for \$4.00.

American Pillar Climbing Polyantha. A New single flowering Rose with blooms two to three inches across, borne in immense clusters. Color lovely apple-blossom pink with bright golden stamens followed in autumn with red hips. A great Rose to grow in pots for Easter.

Purity (CLIMBING WHITE AMERICAN BEAUTY)—Cross of Silver Moon and Kaiserin Augusta Victoria. A hardy, disease resistant variety similar to Kaiserin but of more vigorous growth and greater freedom of bloom. It is much more double than Silver Moon with but a single flower to a stem. Has excellent keeping qualities.

Climbing American Beauty A seedling from American Beauty with Wichuraiana and Tea blood in its veins. The introducers say of it: Same color, size and fragrance as American Beauty with the addition of the climbing habit. Good foliage, and better blooming qualities. Blooms three to four inches across; has proved perfectly hardy, and stands heat and drought as well as any Rose in our collection.

Christine Wright The Climbing Pink American Beauty. A charming new hardy climber which embodies the strong climbing qualities of the class; the shiny, leathery foliage and healthfulness of the Wichuraianas; and the blooming size and freedom of its Testout blood. The flowers come solitary and in clusters, nearly double, 3 to 4 inches across, in a delightful wild-rose shade of pink.

Dr. W. Van Fleet Flowers when open run four inches and over in diameter. The center is built high, petals, beautifully undulated and cupped. The color is a remarkably delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center. The flowers are full and double, of delicate perfume; buds pointed. It very much resembles Souv. de Pres. Carnot in color.

Excelsa A distinct variety in form, color and habit. The color is an intense crimson-maroon, with tips of the petals tinged scarlet. Flowers are large and double, produced thirty to forty on a stem, and almost every eye on a shoot produces a cluster of bright blossoms.

Goldfinch This is the yellow-flowering "Tausendschoen." All know the good qualities of that superb variety.

Well this is a yellow form, and is attracting much attention and many favorable comments.

Gardenia Bright yellow cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.

Hiawatha Distinctly different from other Ramblers, Its small flowers, deep ruby-crimson, accentuated by a white eye, are uniquely borne in long trails of forty to fifty blooms. This variety is very popular for training on fences, not only as a covering for the fence, but because it is really one of the prettiest Roses of its kind.

Paul's Scarlet Climber Vivid scarlet, shaded crimson. Makes a brilliant display for a long period of time in the garden. A wonderful new climbing Rose. Received the gold medal and cup for the best new climber at the National Rose Society's exhibit.

Pink Dorothy Perkins Extremely hardy, withstanding the most severe winters with impunity. The flowers are borne in clusters of from six to ten and are very double, with prettily crinkled petals. Remarkably pretty pointed buds, beautiful, clear shell-pink in color, lasting a long time without fading. The flowers are sweet-scented. The foliage is rich, deep green, and of thick, leathery substance.

Rosarie (Pink Tausendschoen.) Similar to its parent Thousand Beauties, except color, which is a solid deep rose with much larger clusters and many more blooms.

Tausendschoen, or Thousand Beauties The flowers are the most delicate shade of pink ever seen in a Rose; might be described as a white delicately flushed with pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring.

White Dorothy Perkins A pure white sport of the well-known Dorothy Perkins, of same habit of growth and freedom of flowering; a splendid companion for the pink variety, as it flowers at the same time. A most valuable addition to this class.

WE OFFER ONLY TRIED AND TRUE VARIETIES OF ROSES

Baby Dorothy A true dwarf form of Dorothy Perkins, containing the family virtues, and pink beauty. The prettiest pot Rose on the market.

Baby Doll This beautiful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed, a deep, glossy green—a very beautiful setting for the lovely little Doll-Roses. It has a neat, compact habit and will make a beautiful little specimen in pots.

Erna Teschendorff Brilliant, rosy-crimson with flowers of good size in clusters. Said to be the best red among Polyanthas.

Ellen Poulsen Dark, brilliant pink; large, full; sweet-scented; vigorous, bushy habit, most floriferous; very fine.

Rosa Hugonis.

Rosa Hugonis This species, recently introduced from China, is unlike any other Rose. It is of shrub-like habit of growth and naturally forms symmetrical bushes about 6 feet high, and the same in diameter, and while not suited to plant in the Rose border, it is an invaluable subject when planted in connection with other shrubs or as single specimens in the garden. Its delicate yellow single flowers are produced on long arching sprays early in May, every branch of the previous season's growth becomes lined on both sides to the very tips with these attractive flowers, and after it has finished flowering it remains an attractive decorative bush for the balance of the season; perfectly hardy. Large field-grown plants, 7½ cents each; \$7.50 per dozen.

Hardy Hybrid Perpetual Roses

THE HYBRID PERPETUALS or "June Roses," as they are commonly called, are the hardiest of all Roses, standing the cold winters of the North. After once planted they require but little care, increasing in size and beauty each year. They are covered with bloom in June, although they bloom considerably through the summer and fall; but the greatest profusion of bloom is to be seen in June. Our collection of this class of Roses comprises such varieties as are most valuable. They are strong plants, grown on their own roots, will grow and give a profusion of fragrant bloom.

Price, 15 cents each; twelve, for \$1.50. Large two-year-old plants, 40 cents each; twelve for \$4.00, except where noted.

Paul Neyron.

Vick's Caprice.

Vick's Caprice A striking Rose, totally unlike any other variety. The flowers are large, slightly cupped shaped, but full and deep; the petals are thick and lasting, having the ground color clear satiny-pink, distinctly striped and dashed with white and bright carmine. It makes lovely, elegant-shaped buds which show the stripes and markings to great advantage.

Mme. Charles Wood Color very bright, rich cherry-red; blooms the first season and all the time, and is delightfully fragrant. May be called an ever blooming Hybrid Perpetual.

StimUplant Makes a Wonder Garden.

CHRYSANTHEMUMS

THE average householder must depend upon his garden for the Mum show; and is naturally limited to the Earlies, Midseasons, Pompons, etc., which will bloom freely during the fall and before winter sets in. The Pompons particularly make charming potted specimens for the house during early winter. If in a locality where frosts are likely to occur before September 15th, it is best to place the young plants in 5-inch pots and sink the pots in the ground; then they can be readily taken up in September without disturbing the roots, and cared for in a protected place. If very large flowers are desired, all side branches except 2 or 3 should be kept pinched off; then when buds appear take off all buds except one at end of branch. They must be well watered, and kept in a cool room or greenhouse, but not subjected to fire heat more than to keep out frost. The small, black flies which attack the stems may be destroyed by frequent sprinkling of tobacco dust or tobacco water.

EVER-BLOOMING PELARGONIUMS

BETTER KNOWN AS LADY WASHINGTON
GERANIUMS

The Grandest of All Flowering Plants

Do not resemble the common Geraniums in any particular, either in foliage or flower; more beautiful in every way. We here offer six distinct sorts, every one entirely different in color and every one a beauty. The Lady Washington Geraniums are the hand-some-est of all flowers—once seen, never forgotten.

PRICE, 25 CENTS EACH; FIVE FOR \$1.00.

(Plants from 2½ inch pots.)

Easter Greeting This new species is the earliest of all Pelargoniums, with enormous florets and clusters, having light green foliage and of dwarf, robust growth. It blooms from March until fall. The florets are of a fiery amaranth-red with five regular shaped spots. The first and only kind to bloom as well bedded out as in pots and to do so all summer. The only kind that stands bedding out in groups. It rivals the Azalea in beauty as a pot plant for Easter, and when bedded out in summer will remain in bloom until time for frost in September.

Gardener's Joy The ground color is apple-blossom pink, the two upper petals have blotches of carbon-brown, the florets are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster. It is of a half-dwarf nature and very sturdy. On account of its rapid, luxuriant growth, it is a very profitable market variety.

Glory This splendid novelty is quite remountant, florets and clusters are very large; ground color blue, very much like the Cattleya Orchid. The upper petals contain two large purple magenta-red spots, distinctly veined. An exceedingly beautiful and entirely new color in Pelargoniums. This kind has a very robust growth.

Lucy Becker This grand novelty is a sport of Easter Greeting and is like it in everything but color, which is a rosy-pink. It is, if anything, even more free in bloom.

Prince Immensely large flowers, strongly crimped, of fine shape, with from six to ten petals, color rich purple with velvety black blotches. Remarkably robust habit. The large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.

Pansy Geranium—Mrs. Loyal.

MRS. LAYAL

(The genuine "Pansy Geranium.") Rounded, satiny, exquisitely marked and colored, this variety is truly Pansy-flowered. Its colors range from a large crimsoned chocolate center through pink to white at the edges.

Price, 25 cents; \$2.50 per dozen.

GLOXINIA

Magnificent for house culture, producing in great profusion, beautiful flowers of rich and beautiful colors. They succeed best in sandy loam and peat, and require a moist heat.

LARGE FLOWERING VARIETIES—Mixed Colors only. Each, 35 cents; per dozen, \$3.50.

TUBEROUS-ROOTED BEGONIA

The Tuberous-Rooted Begonia is the fashionable plant of the day, and richly does it deserve its honors, for in addition to very handsome foliage, it bears a never-ending profusion of the most ravishingly beautiful flowers the whole summer, and then with the coming of cold weather, very obligingly takes a nap until spring, asking no further care through the winter than to be packed in soil away from frost. The enormous size and intense brilliancy of the flowers astonish those who have never seen any but the ordinary house Begonia. The bulbs can be started from March to June and will be in full bloom. Must be kept from direct sunshine. A good place for them is on the north side of a house or grape arbor.

SINGLE—White, rose, scarlet. Price, 30 cents; Dozen \$3.00.

DOUBLE—White, salmon, rose, scarlet. Price, 30 cents; Dozen \$3.00.

FLOWERING BEGONIAS

Blooming. We can furnish Flowering Begonias from 2½ inch Pots, 20 cents Each, 12 for \$2.00 EXCEPT WHERE NOTED.

ARGENTEA GUTTATA

This variety is an introduction of M. Lemoine and is a cross between Olbia and Alba Picta. This beautiful sort has the silvery blotches of Alba Picta, the grace and beauty of growth of Olbia. It has purple-bronze leaves, oblong in shape, with silvery markings, and is in every way a most beautiful Begonia. Produces white flowers in bunches on ends of growth stems. Good for house culture.

Argentea Guttata.

ALBA PICTA—Long, pointed, slender leaves, thickly spotted with silver-white. Foliage small and elegant.

ALBA PERFECTA GRANDIFLORA—We doubt if there is a white-flowered variety that equals it. The foliage resembles Rubra in shape, but it is lighter green, while the flower panicles are much handsomer. It is a pure white flowering Begonia of much merit.

Coralline Lucerne.

CORALLINE LUCERNE (The Wonderful Flowering Begonia.)—This Begonia has simply taken everybody who has seen it by storm. It certainly is a wonder. The blooms last from a month to six weeks, and are borne in immense clusters, almost hiding the plant. The color is bright coral-red, changing to a delicate pink. It is past the power of speech to describe it. A wonder. Price, 30 cents each.

CHATELLAINE SUPREME—This Begonia is undoubtedly the freest blooming variety known. Is of easy culture, low bushy habit and literally covered the entire year with a wealth of bright pink flowers with yellow stamens. It well merits the name of Ever-Blooming Begonia.

FOLIOSA—A handsome basket plant, the foliage is small and delicate, and contrasts well with its white bloom, very elegant.

GRACILIS LUMINOSA (Red.) Strong and robust. The most free-flowering of all Begonia, always in bloom—spring, winter and autumn. The flowers, when first opening, are a bright cherry, changing to a clear coral-red. Its foliage is rich glossy green, often shaded deep bronze.

M. DE LESSEPS—The leaf is of silky texture, and is beautifully spotted with silver. Very strong, free-growing variety, that will succeed with any ordinary care, growing rapidly and sending out quantities of beautiful white and pink flowers.

PINK RUBRA—We doubt if there is a pink flowered variety that equals it. The foliage resembles Rubra in shape, but is a lighter green, while the flower panicles are much handsomer. It is a pure pink flowering Begonia.

PICTA ROSEA—Very compact in growth, forming a dense, well-proportioned bush with rich green foliage, spotted with silver. Flower rosy-flesh color shaded with a silvery-pink and enlivened with dense clusters of yellow anthers. Most wonderful flowering Begonia within our knowledge.

PRESIDENT CARNOT—A remarkably strong-growing variety of stiff, upright habit, foliage large and somewhat in style of Begonia Rubra, but more than twice as large; upper side purplish red, flowers beautiful coral-red, in large pendant panicles. A truly magnificent sort—we believe the best of the recent introductions.

THURSTONI—The under side of the leaves is a rich purplish-red, the veins very prominent, while the face or upper side is a bronzy-green, shaded with crimson and olive, with a peculiar glossy-metallic luster over all. Flowers rosy-white, in large clusters well above the foliage. The plant has a fine habit.

Hardy Bedding Begonia

Evansiana

This is a tuberous-rooted, herbaceous, hardy perennial Begonia, losing its tops in the fall. When bedded out, the bulbs remain in the soil and start new growth in the spring. The plants like a rich, porous soil and partial shade and will bloom throughout the summer. Produces clusters of flowers and buds of a beautiful pink color by the hundreds during an ordinary growing season. Price, 20 cents each; four for 75 cents; dozen, \$2.00.

BEGONIAS ARE MOST SATISFACTORY PLANTS FOR THE HOME.

REX BEGONIAS

Louise Closson.

Louise Closson Purplish tinted. One of the richest and most beautiful of the Rex family. The coloring is simply magnificent, center of leaf deep maroon with broad band of silvery rose, edged bronze, giving the whole leaf a purplish tint. The oddest color of all the Rex. Price, 25 cents.

Speculata Quite a novelty in the Rex type. Leaves are in the form of a grape leaf. Color is a bright green, with a background of chocolate; veins of a light pea-green, the whole leaf spotted with silver. In bloom it is magnificent; the panicles composed of great numbers of individual pink blooms, are lifted high and spray-like quite clear of foliage. Price, 20 cents each; 3 for 50 cents.

Begonia—Mrs. A. C. Townsend.

Mrs. A. C. Townsend Belongs to the Ricinifolia family; leaves are a charming lustrous metallic-green color; an unusually profuse bloomer; flower of a delicate light pink, borne on long foot stalks. Price, 25c each; 3 for 65c.

Beefsteak Begonia (Feastii) A low, spreading Begonia, with perfectly circular leaves, red beneath, and dark, glossy green above, and of heavy texture. The finest pot Begonia we have for house culture. Price, 25c each; 3 for 65c.

CARNATIONS!

Price, 15 Cents Each; Twelve for \$1.50.

Plants in the open ground quickly make large specimens, and when brought indoors in the fall, produce an abundance of flowers throughout the entire winter. Pinch the plants back frequently during the growing season.

Aviator Among the newer red carnations, there is no more satisfactory and pleasing kind than this. It is good sized, bright scarlet.

Benora Clear white, penciled with bright red. Narrow foliage; long stems. Flowers large, freely produced. Very clear-cut and beautiful; keeps like an "everlasting flower;" even growers who have been prejudiced against "flaked" varieties admire and grow Benora, because it pays handsomely for its keep, and is a pleasure to handle; always in good health and good humor.

Enchantress Supreme A light salmon pink which does not bleach in full sun, and is not so liable to split as the Enchantress it improves.

Matchless This new white variety is well named, and well deserved the two gold medals that it won; besides being of exhibition size and quality, it is a true commercial, easy to handle, comes into bloom early, and is quite continuous, a non-burster.

Rose-Pink Enchantress This lovely Carnation is indispensable for the garden. It is of exquisite shade and does not fade. The growth is particularly free and robust, very persistent in flowering and seemingly without a fault. Blooms are of enormous size. Strong stems. The color is an exquisite shade of rose pink. Its season of bloom is long. No garden is complete without it.

Pocahontas

Pocahontas The flowers are full and double, finely fringed, borne in wonderful profusion on long, straight stems, remarkable for their wiry strength, surpassing the ordinary Carnation in that particular. The color is a deep, lustrous carmine-crimson, very brilliant and showy. The habit of the plant is vigorous and branches freely; foliage and stems dark green. The flowers under ordinary cultivation and without disbudding will average from two to three inches across.

White Enchantress This old favorite has stood the test of time and is today one of the three finest white Carnations. It is a clean grower, and produces good flowers constantly throughout the season.

DOUBLE FLOWERING, HARDY SCOTCH OR SWEET MAY PINKS

Price, 15 cents each; 2 for 25 cents; 12 for \$1.25.

These are dwarfer than the Carnation, growing about one foot in height, the colors being of the various shades of maroon, carmine and rose, beautifully laced and banded on white ground; flowers perfectly double, clove-scented, and the plants will stand outdoors year after year, being entirely hardy.

Abbottsford Deep, carmine, marbled with white.

Her Majesty Unquestionably one of the finest of the century. Color pure white.

UNNAMED REX BEGONIAS

The broad leaves, high coloring and exquisite markings of Rex Begonias make them invaluable as decorative plants for house culture. Give them a soil composed of rich loam, woods earth and sharp sand. They require a warm, moist atmosphere and a shady situation. Do not allow the sun to strike the leaves while wet, and do not overwater. They may be planted in a shady situation under trees or alongside of the house. Rex varieties make immense leaves. We can furnish REX BEGONIAS in choice sorts at 25 cents each, 3 for 65 cents.

They require very little care or attention, and produce a finer effect than any other plants you can get for many times their cost. The varieties listed herewith include the newest and most beautiful sorts to date. The ordinary temperature of the living room suits them nicely, and their new growths will soon surprise you with their graceful beauty.

Innisfallen.

NEW FERN INNISFALLEN

This handsome new variety originates with us and is here offered for the first time. It is of the *Elegantissima* type, a strong and rapid grower, handsome green foliage, and has a stiff mid-rib which makes the fronds stand up better than most varieties of ferns. It has a distinctness of its own and is most desirable in all respects. Price, young plants, 25 cents each; large plants, 50 cents each.

MOSS FERN

THE "ROOSEVELT FERN"

(*Nephrolepis Roosevelt*)—In general characteristics it resembles the Boston Fern, but with two points of great excellence over that variety. First it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other Fern. It is highly recommended.

THE POPULAR BOSTON SWORD FERN

(*Nephrolepis Exaltata Bostoniensis*)—In the vicinity of Boston no other plant is used so extensively as this graceful *Nephrolepis*, which differs from the ordinary Fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern.

NEW DWARF BOSTON FERN

This variety produces about twice as many fronds as the old Boston type. It is much more compact thus making a bushier plant and one that can be used in any decorative plan desired; equally useful in porch boxes or baskets. The best of type.

OSTRICH PLUME FERN

(*Nephrolepis Whitmanii*)—An improvement on the *Nephrolepis Elegantissima*, with still more gracefully divided pinnae, giving the whole plant an airy lace-like appearance; makes beautiful symmetrical plants even in small sizes and large specimen plants are beautiful beyond description.

NEPHROLEPIS SPARROWII

We take pleasure in offering to our customers this valuable variety, a true sport of the Neph. *Superbissima* (or *fluffy Ruffles*) Fern. It has the dark green foliage of its parent, which, with its beautiful crested fronds, makes it a most unique, distinct and desirable Fern. One of the most distinguishable features of this Fern is its robustness, which makes it a very rapid and easy grower, a Fern the amateur can grow with success. We recommend this variety most highly.

Selaginella Emiliania ("Moss Fern.")

Set bulbs 2 to 4 inches deep and 2 inches apart in the drills, single rows 12 inches, and double rows 18 inches apart. Beds do well planted 4 to 6 inches apart each way.

It is quite hardy and will thrive equally well in shade or in sunny locations. Especially valuable for planting along walks and drives and for massing in the border. ALTHEA USED FOR HEDGE

ALTHEA or ROSE OF SHARON

There is no plant today more useful or desirable for hedge purposes than the Althea or Rose of Sharon. It has all the good qualities of any other hedge plant, some that no other hedge plant has.

VERY HARDY.

It will do well in nearly all locations, except in the extreme cold sections of the northern states. It is a sturdy grower and will flourish where many other shrubs would fail to grow.

BEAUTIFUL IN BLOOM.

In season these shrubs are covered with beautiful flowers, some of them double, which range in color from Blue and Purple to Violet and Red, Flesh color and White. A Hedge of Altheas in bloom is a sight never to be forgotten. They remain in bloom from 4 to 6 weeks, and its bright green foliage makes it a beautiful hedge either in or out of bloom.

MAKES EITHER A TALL SCREEN OR A LOW HEDGE.

If left untrimmed they will make a fine tall screen 6 to 8 feet high. They should be planted 12 inches apart for screen purposes, and about 8 inches when used as a low hedge. They can be kept down as low as 2 feet, with very good results, except that they will naturally produce less bloom as a low hedge, than if left to grow tall.

TRANSPLANTS VERY EASILY.

Few shrubs will transplant as easily as the Althea, and with as little loss. The plants we are offering will make you a good hedge or screen the second year after planting and will reward you each year many times their original cost.

TAKES VERY LITTLE CARE.

Altheas will do well in almost any soil, but like all other plants, will do best if given good soil. They do not require trimming as often as other hedges and will make you one of the most interesting hedges you can plant. Should be trimmed in spring, before growth starts, to height you wish.

ALL SHRUBS ARE FURNISHED IN DORMANT CONDITION.

Five Best Hardy Lilies For Summer Blooming

One Each of These Five Grand Lilies for \$1.65.

AURATUM (The Golden Rayed Lily)—This grand summer-flowering sort is now considered Queen of Lilies. It produces its handsome richly colored flowers in large clusters, and blooms profusely. When expanded, flowers measure from eight to ten inches in diameter; are composed of six pure white petals, each of which is distinctly striped the whole length with a clear yellow-golden band and thickly studded with crimson spots. Gracefully formed, deliciously fragrant. Large sound bulbs, imported direct from Japan, price, 40 cents each; three for \$1.00.

SPECIOSUM ALBUM—Among the showiest of all Lilies and perhaps the most robust and the most radiantly beautiful. Very fragrant and hardy, with broad, flat stems and immense heads of beautiful white flowers—often fifty flowers in a cluster. Price, 60 cents each; three for \$1.50.

LONGIFLORUM GIGANTEUM—Japan grown. Widely used for forcing for Easter holidays. Its flowers have more substance and last longer in bloom than the Bermuda Lily. Quite hardy and beautiful in the open ground, blooming in June and July. Flowers snow-white and trumpet-shaped; very fragrant. Price, 40 cents each; two for 75 cents.

DOUBLE TIGER—(Tigrinum fl. pl.) This magnificent Lily is borne in immense clusters on tall stems; the flowers are very large, frequently six inches across, and very double; color deep fiery-red, spotted with black. Price, 30 cents each; three for 75 cents.

SPECIOSUM RUBRUM—One of the most popular and satisfactory of all Lilies; is considered by many as the finest of all Lilies. Flowers are bright crimson and white spotted. Splendid large flowers, borne in clusters; stem two to three feet. Price, 40 cents each; three for \$1.00.

Lily of the Valley

Hardy Regal or Royal Lily

"One of the most beautiful of all known lilies. Highly recommended for general culture both for the open ground and for pots."

The outside of the flower is white, very faintly tinged with yellow at the base of the trumpet, and with pink at the point. The midribs are purple. The inside shows a bright canary-yellow deep in the throat, shading to pure white with just a hint of pink showing through from the outside. Mature bulbs produce plants 3 to 4 feet high, bearing 3 to 10 flowers.

Price 50 cents each; 3 for \$1.25; 12 for \$5.00.

Lily of the Valley

Forced in immense quantities for cut flower work by florists as they are useful in so many different combinations, but their main hold upon the affections of plant lovers is their hardiness and humility. The Lily of the Valley will thrive in any kind of soil and throw up its beautiful, modest, fragrant white bells in the out-of-the-way nooks, the shady spots, the neglected corners, where bolder and more ambitious flowers would scorn to bloom. Will also adapt itself to pot culture in winter, its delicate, permeating fragrance making it especially desirable.

Price, 6 for 35c. 65c per dozen, \$4.75 per hundred.

Hyacinthus Candicans

Foundation Planting of Hardy Ferns.

HARDY FERNS

The hardy fern is recognized as one of the most attractive plants for decorative and ornamental purposes in natural groves, parks and private gardens. Most of our native ferns do well under cultivation, and they do especially well in shady and half shaded places; are very useful for growing close to houses and in corners which are too shady for other plants.

Most ferns do best in a light soil containing much vegetable matter, and it is always best to work a considerable amount of leaf mould into the soil of a fern bed. While few ferns grow well in very dry soil, the common notion that they require very wet or almost swampy conditions is not well founded. Most of them, even those that grow naturally in very wet places, do nicely under ordinary garden treatment, in the matter of moisture.

While the native ferns are, of course, perfectly hardy, most of them are better off with a light covering of leaves in winter. In their natural habitat they are usually well covered with leaves and snow throughout the winter.

We offer only the four most popular varieties. One each of the four, postpaid, for \$1.25.

HARDY MAIDENHAIR FERN—(Adiantum Pedatum.) Perhaps the most graceful of all; attains a height of 12 to 18 inches when grown in rich, moist, well drained shady locations. When once established it increases from year to year. Maidenhair should be planted for massing, not more than 8 inches apart and plant about 1 inch below the surface. Each, 35 cents; twelve for \$3.50.

CHRISTMAS FERN—This fern, when grown under ideal conditions, attains a height of three feet, its peculiar grace and beauty makes it desirable in all fern gardens. It is one of the very best species for growing as an individual specimen and ranks with the Ostrich and the Osmundas in size and vigorous beauty. Plant the crown level with the surface and if massed effects are desired 12 inches apart. Each, 35 cents; twelve for \$3.50.

OSTRICH FERN—(Onoclea Struthiopteris.) Growing in a crown, fronds 2 to 4 feet by 6 to 10 inches wide; a very erect, handsome species, graceful as a palm. One of the most satisfactory for the amateur, always giving satisfaction in the open or shaded nook. Use lots of manure, leaf mold or well rotted peat and it will multiply by underground runners, especially so in moist, sandy or peat soil. Plant crown level or one-fourth of an inch above surface and mulch in winter. Its vase-like masses of foliage are dark green and is one of the tallest of our ferns and should be planted well back. Price, 25 cents each; twelve for \$2.50.

INTERRUPTED FERN—(Osmunda Claytoniana.) A large fern growing in a crown 2 to 3 feet high, 8 inches broad, clothed with rusty wool when young, very beautiful, cinnamon colored leaves. Does well under cultivation in high, shady or open places. Prices, 40 cents each; twelve for \$4.00.

"WATCH-EM-GROW" PLANT FOOD IS FINE FOR BOTH GARDEN AND HOUSE PLANTS.

SUPERIOR FLOWER SEEDS

Our flower seed list has been carefully revised, some new sorts added, and all the inferior kinds omitted, so that there is nothing in the list but what is worthy of cultivation, and if reasonably cared for, will give satisfaction. Our aim is to offer nothing but the best and surest to please, a condensed list of leading kinds, and not the most bewildering and extensive list of varieties.

All the seeds herein offered are grown for us by the most experienced seedsmen of this country and Europe, and are the best that money can buy.

GENERAL CULTURE DIRECTIONS—Most flower seeds germinate well in fine, sandy loam, partly protected from the sun. Heat and moisture are the two essential points to start life in seeds. A general and fatal error is to start the seed too deep; small seeds should be barely covered with fine earth; large seeds by about half an inch. After sowing, the ground should be watered with a very fine sprinkler regularly. Many seeds are killed by drought.

Selection of the Best Sweet Peas

Everybody likes Sweet Peas and they are grown with so little care, and bloom so profusely that the smallest garden should contain a good supply. Sweet Peas should be sown as early in spring as possible. The soil should be rich, the drills six inches deep. Cover first about an inch, and as the plants grow fill in until the drill is full. A mulch of hay or rakings from the lawn will be found beneficial during hot weather. The flowers should be cut as often as possible, to prevent the plants from running to seed, which would stop them from continuing to bloom.

Golden Bantam is as distinct in flavor from that of white varieties as in color—being almost literally "sweet as honey." The skin is exceptionally tender. The varieties we are offering below are the best possible to plant either for home growing or commercial purposes.

STAYMAN'S WINESAP—One of the finest apples grown for appearance, flavor and juiciness. A favorite for cider. SECKLE—This well known little pear has attained the rank of standard in quality on account of its rich delicious flavor; very popular for dessert. August and September.

DWARF PEARS

The Pear is very profitably grown as a dwarf. These pears differ from the standards inasmuch as they are propagated on a quince root, which makes it slow growing and dwarfish. The fruit is the same in either case. The quality and appearance of the fruit will convince anyone that they are excellent to plant.

LOMBARD PLUM

NIAGARA GRAPE

NIAGARA—When fully ripe the berries are a greenish-yellow. Skin tough with quality similar to the Concord. This is the leading white grape for home and market use.

AGAWAM—Large, compact, dark red or maroon colored berries. Ripens early and is very attractive.

SALEM—A strong, vigorous vine; berries large. September.

BLACKBERRIES

ELDORADO—This is a comparatively new variety, and has proven itself to be the best of all blackberries under cultivation. After once fruiting Eldorado, berry growers discard almost all other varieties which they have. It is very hardy, claimed to have no equal in this respect. Fruit very large, jet black, good shipper, good quality, and a great producer. We personally recommend this variety above any other that is offered.

SNYDER—Very hardy, great producer, medium size and one of the best known varieties of blackberries, succeeding wherever planted. Over production is its greatest fault.

Price, 10 for 60 cents; 100 for \$5.25, postpaid.

RASPBERRIES

CUMBERLAND—The fruit of this variety is largest of all the black caps; firm, a good shipper, and one of the most profitable as a market berry. Very choice black cap.

CUTHBERT—Considered the queen of the market, as they bring a higher price on the market than any other of the red raspberries. The fruit is large, dark, crimson, firm, sweet, rich, highly flavored, and as beautiful as strawberries.

KING—A very early red berry that always commands a good price. The plants are hardy and productive and the King Raspberry is earlier than any other variety.

Price of the above named varieties, 10 for 55 cents; 100 for \$5.00, postpaid.

St. Regis Everbearing

This raspberry of recent introduction stands in a class alone. It will produce fruit from June until the berries freeze in the fall or early winter. The fruit begins to ripen very early and continues on the new canes throughout the remainder of the summer and fall months. Berries are a bright crimson, good size, rich, sugary, with excellent raspberry flavor. Flesh firm and meaty, a good shipper. Prices on St. Regis, 10 for 80 cents; 100 for \$5.50, postpaid.

GRAPES

One of the most satisfactory crops that can be grown, because it can be depended upon practically every year. Grape vines will grow almost everywhere, but to produce the finest specimens they should be carefully cultivated and pruned. A south or southwestern exposure will, as a rule, give best results. The soil should be dry, and if not naturally so, should be artificially drained before planting.

A top dressing of well-rotted manure should be applied each year, alternated every few years with a dressing of slaked lime.

Grapes can be easily trained over fences, buildings, arbors, summer-houses, pergolas, etc., and in this way are ornamental as well as useful. The enemies of the grape vine and fruit are very few and can be easily kept in check.

Price—Extra strong vines, 30 cents each, 10 for \$2.75, 25 for \$6.25, postpaid. One each of the set of six for \$1.65.

CONCORD—From sheer merit the Concord has become the most popular grape in the United States. Taking the country as a whole, more Concord is now in bearing than of any other variety. No other grape succeeds over such a wide area or in so many different soils. It is the standby in grapes. New varieties may come, but they have to work hard to reach the Concord standard for market purposes. Matures early, keeps well, ships well and sells well. Bunches big, berries are juicy, sweet and delicious. Concord overcomes local grape troubles and is safe to plant.

WORDEN—A seedling of the Concord. Large, bunches which ripen ten days earlier than the Concord. This variety deserves a good place on the market and should be planted in every garden.

WYOMING—Vine very hardy, healthy and robust. Berries a beautiful light red; nearly double size of Delaware. Flesh tender, sweet, juicy. Best early red grape.

MULBERRIES

On account of the beautiful heavy foliage and compact growth of the mulberries, they are frequently classed as ornamental trees. They are very hardy and long lived, in fact one specimen of which we know is more than three hundred years old. Throughout the Western States they are frequently planted for windbreaks and hedges, and are valuable for posts and because the fruit attracts many birds, they can be planted as a protection to orchards. Price, 3 to 4 ft., 75 cents each. (By Express.)

AROMA

STRAWBERRIES

Prices, 65c per dozen, \$1.75 per 100, 500 for \$6.50, Postpaid.

Senator Dunlap (Per.)—The demand for this variety has been increasing steadily, as it has an unusually long fruiting season. It bears immense quantities of large, handsome, rich, fine-flavored, dark red berries, which are uniform in size and shape and very attractive in appearance. The demand for this variety among fruit growers shows that it is coming to the front as one of the best.

Glen Mary (Per.)—Midseason. Unexcelled as a long-distance shipper and one of the best for our western states, as it resists dry weather admirably. A heavy bearer of large, delicious fruits.

Haverland (Imp.)—On account of the hardiness, wonderful productiveness of the plants, and the general appearance, good shipping qualities, and excellent flavor, this berry continues to grow in popularity. It has always proven to be one of the best varieties wherever planted, and thrives best with Senator Dunlap as fertilizer.

Gibson (Per.)—Medium to late fruiting. A most popular sort with berries of beautiful carmine color. The fruit is large, firm, and of unusually delicate flavor. The long stems make picking very easy. A fine shipper and suitable for fancy market. A leading variety with many growers.

ASPARAGUS PLANTS

Prices, 12 for 65c, 25 Plants for \$1.10, 100 for \$3.25, Postpaid.

It is not necessary to tell the good qualities of the asparagus, as it is known to everybody. It is the most healthful and delicious of the early vegetables. It is very easily grown, and no plant will produce as the asparagus does with a little outlay. May be either planted in fall or spring. Dig up the ground deep, put on plenty of well-rotted manure, thoroughly mixed in the soil, throw out a bed about four to five inches deep, lay the plants in by spreading the roots out well, and scatter the dirt over the plants about four inches, or the depth of the ground thrown out, press the dirt well around the plants by patting it down with a spade or shovel, then top-dress the ground with about three inches of well-rotted manure and scatter salt enough over the top of this to make the ground white enough to track a rabbit. The second year after planting, you will be able to harvest enough asparagus for a good sized family from a bed of about two hundred plants. Two hundred plants will make a bed three feet wide and fifteen feet long. Keep the crown of the asparagus cut regularly so it will not get too large and woody.

PLANT A PRIVET HEDGE FENCE

It will cost you less than the cheapest fence you can build.

It will outwear the best fence you can build.

It will look better than any fence you can build.

Ibolium Privet

If California Privet were hardy everywhere, there would be no need of any new variety of Privet. In spite of the fact that California Privet freezes down occasionally, it has become the most popular hedge plant.

The Ibolium Privet however combines all the good qualities of the California Privet with perfect hardiness, making it the best Privet hedge plant on the market today.

It has shiny deep green leaves, holds them till late in the winter, does well in all kinds of soil and in all kinds of locations, grows rapidly and is perfectly hardy.

PRICES OF IBOLIUM PRIVET

We offer plants, 18 to 24 inches high, by mail, postpaid, for 25c each; \$2.00 per doz. By express, 25 for \$3.00; 100 for \$10.00.

California Privet

There are many plants that can be used with satisfactory results for hedges but the great demand for California Privet proves it to be the most popular of all hedges. When we stop to consider that its cost is trifling when compared with either wood or iron fences and that it will outlive either, the reason for its increased popularity becomes apparent. California Privet can be planted in either single or double rows and should be planted 8 inches apart. 100 plants will make a fence 66 ft. long and using our 12 to 18 inch size would cost only \$5.00. The California Privet will hold its leaves thru most of the winter months and can be trimmed to any desired shape. When compared to a mechanical fence of any kind it is a comparison of the living with the dead as your wood and iron fence will rot down whereas the privet will become more beautiful each year. We have had a very favorable growing year and have a better stock of California Privet this year than ever before. Plant a hedge of these and you will never regret it.

SEEDS FOR CUT FLOWERS THIS YEAR

Here is a selection of desirable varieties of flower seeds from which results may be had the first year; all will produce in abundance, long stemmed flowers for cutting.

CALENDULA

(Pot Marigold)

One of the best and showiest free - flowering hardy annuals, growing in any good garden soil, producing a fine effect in beds or mixed borders, particularly bright in late fall, continuing to bloom from early summer until killed by frost; valuable also for pot culture; blooming freely in winter and early spring.

ORANGE KING—An extra fine strain of this splendid double rich orange-red variety, producing flowers about 3 inches in diameter. Packet, 10c.

GOLDEN KING—Rich golden-yellow flowers of large size, and borne on long, strong stems, making it of special value for cutting. Packet, 10c.

THE SUNSHINE ASTER

IMPROVED ANEMONE FLOWERED

A new type, introduced in England several years ago, but greatly improved by additional color selection. A most attractive variety. The plants are sturdy and strong, throwing up long flower stalks, making wonderful cut flowers. Some of the flowers have twisted petals and some have quilled petals; all have a cushion center of tiny quills of a contrasting color which makes a flower look as if it was covered with snowflakes. The blue flowers are dotted with a paler blue and some in white, and the rose in a lighter shade of pink or white. Their delicate beauty is hard to describe. A wonderful cut flower variety, borne on long, stiff stems, and the flowers last a long time after cutting. Mixed colors. Price, packet, 25c.

DOUBLE-FLOWERING COSMOS

The flowers vary considerably in their degree of doubleness, some being absolutely double, while others have a frill or collar surrounding the double disc, and while we think this is the most artistic, they are beautiful in either form and of high value for cutting and garden decoration. Price—Crimson, Pink, White, packet 20c; 3 for 50c. Mixed colors, packet, 15c.

NIGELLA—LOVE IN A MIST

Nigella is a neat plant about a foot high with finely cut, mist-like foliage, loaded with large, blue, oddly shaped and beautiful flowers, from July to September. Well adapted for pots and borders. Sow in rich soil in a sunny spot where they are to remain, as they cannot be very well transplanted; and thin to a distance of about 8 inches.

MISS JEKYLL—Blue, packet, 10c.
MISS JEKYLL—White, packet, 10c.
